

Photomultiplier Tube

Model: OPR-PMT1013-BC

Features

- Wide Spectral Response
- High Gain
- High Cathode Sensitivity

Applications

- Environment Monitoring
- Semiconductor Detection
- Bioluminescence Detection
- In Vitro Diagnosis

Technical Specification

Window material	Borosilicate glass			
Photocathode material	Bialkali			
Proportion of cathode	8×24 mm ²			
Dynode structure	Circular			
Spectral response	300nm~650nm			
	Min.	Typ.	Max.	Unit.
Peak Quantum efficiency		25		%
Peak Photocathode Radiant sensitivity		75		mA/W
Photocathode Luminous sensitivity	50	70		μA/lm
Gain	2×10 ⁷			--
Anode Luminous sensitivity	1000	1400		A/lm
Anode current		3	7	nA
